EXPERIENCE

2024   Espinosa Consultores - Full Stack Developer

- I led the development of custom applications using MEAN and MERN stacks, and websites from scratch with WordPress in collaboration with multidisciplinary teams.
- Configured servers for clients, optimizing resources by implementing caches and load balancing. I performed hosting, website and email migrations.
- Developed a web application integrated with Google Analytics to monitor customer campaigns, using Next.js and Google tools.
- Advised clients on technical options for hosting and specific functionalities, ensuring solutions aligned with their business needs.

2023   GrupoOro - Full Stack Developer

- I supervised the work of up to 10 interns, guiding their technical development and collaborating on client projects.
- Designed full stack web applications with Next.js, adapting to deadlines and specific needs of each client.
- I maintained constant communication with clients, leading custom projects and ensuring the quality of deliverables.
- I developed websites using WordPress.

2022   The Whiteam - Desarrollador Web Junior

- I learned and developed components with Angular, applying clean code principles to improve code efficiency and maintainability.
- I collaborated in the creation of corporate websites, integrating custom solutions for clients...
